26 March 1981

MEMORANDUM FOR: Deputy Director for Processing

FROM: STATINTL

Chief, Program & Budget Group

SUBJECT: New Terminal Requirements for Applications in 1983

1.   I am forwarding on to you 14 terminal requirements Applications prepared for 1983. Please include them in your plans for terminal support to Applications in 1983.

2.   As you probably know, we do not include ODP requirements in the regular user requirements identified in our program. One reason we do not include them is that we consider ourselves as the provider of a central processing service and not a user. Also, by not including our requirements with the users, we avoid the Directorate ADP Control Officer determining our allocation out the total for the DDA, and DDA approval is not necessary for terminals needed to support our requirements.

3.   I have an understanding with Engineering that they will provide the terminals necessary to support ODP activities. The method used to determine ODP requirements is up to them. However, in a discussion with Applications personnel about the 1983 terminal request forms user offices were required to submit to ODP, I suggested they might want to use the same form to communicate with Processing.

/S/
